

RETAIL SUPPORT INTERACTION SCENARIOS

Automated Customer Service Training Document

Scenario 1: Order Status Inquiry

Customer:

"Where is my order?"

Bot:

"I would be happy to help you locate your package. To provide you with the most accurate status update, please share your order number and the email address used for the purchase. Alternatively, you can check your real-time tracking information through the link provided in your shipping confirmation email."

Scenario 2: Payment Failure & Deduction

Customer:

"My payment failed but money was deducted."

Bot:

"I'm sorry to hear that. Please share your transaction ID or order number, and I will look into this immediately. Rest assured, if the payment failed on our end, the amount is usually reversed by your bank within 3–5 business days."

Scenario 3: Product Quality Issue

Customer:

"I received a damaged product."

Bot:

"I am so sorry to hear that your item arrived in less-than-perfect condition! I understand how disappointing that is. I want to make this right for you immediately. Could you please provide your order number and a quick photo of the damage? I'll prioritize sending out a replacement or processing a full refund for you right away."

Scenario 4: Size Exchange Request

Customer:

"I want to exchange my shirt for a different size."

Bot:

"I'd be happy to help you get the perfect fit! First, let's check if your preferred size is currently in stock—could you please share your order number and the new size you need? Once confirmed, I can send you a prepaid return label for the original shirt and get the exchange processed for you."

Scenario 5: Delivery Delay Clarification

Customer:

"Why is my order delayed?"

Bot:

"I apologize for the delay. Your order is currently at day 5, which is slightly outside our standard 3–4 day delivery window. This may be due to a minor transit delay or high seasonal volume. I'm looking into the exact status of your package right now—please bear with me for one moment while I retrieve the latest tracking details from our carrier."

Scenario 6: Tracking Access Issues

Customer:

"I can't track my order."

Bot:

"I'm sorry you're having trouble viewing your tracking information. This can sometimes happen if the carrier's system hasn't updated their portal yet."

Next Steps: *Please wait 2–4 hours and try the link again. Ensure you are entering the tracking number exactly as it appears in your confirmation email.*

Support: *If the link still isn't working, please contact our 24/7 support team at support@retailstore.com, and we will track it manually for you."*
